Report of the Actuary on the Annual Valuation
of the Retiree Medical and Life Insurance Plans

for Fiscal Year ending June 30, 2010

Cavanaugh Macdonald
CONSULTING, LLC

December 16, 2010

Board of Trustees
Teachers' Retirement System of the State of Kentucky
479 Versailles Road
Frankfort, KY 40601-3800

Members of the Board:

Governmental Accounting Standards Board Statements No. 43 and 45 require the Teachers' Retirement System of the State of Kentucky (the System) to conduct actuarial valuations of the System's retiree medical and other post employment benefit plans. This report covers the Medical Insurance Fund and OPEB liabilities related to the Life Insurance Fund. Cavanaugh Macdonald Consulting, LLC (CMC) has submitted the results of the annual actuarial valuation prepared as of June 30, 2010. While not verifying the data at source, the actuary performed tests for consistency and reasonability.

The valuation indicates a total annual required contribution of 7.20% of active member payroll for the Medical Insurance Fund payable for the fiscal year ending June 30, 2013 is required to support the benefits of the Kentucky Employees Health Plan and the Medicare Eligible Health Plan. Of this amount, 1.43% of payroll is estimated to be paid by University members entering the system prior to July 1, 2008 and 1.75% of payroll is estimated to be paid by all other members, leaving 5.77% and 5.45% respectively, as the remaining annual required contribution. This annual required contribution reflects the assets currently held in the Medical Insurance Fund. Given the changes to benefits, funding, and investment policy, the discount rate for valuing liabilities is 8.00%. Schedule A provides the liabilities of the medical plans under the alternate discount rate assumptions of 4.50% and 7.50%.

The Medical Insurance Fund valuation takes into account, as appropriate, the effect of amendments to the medical plans enacted through the most recent session of the Legislature. These changes include: an increase in cost sharing for current and future retirees not eligible for Medicare in the form of a minimum contribution based upon the projected Medicare Part B premium (phased-in over three years, beginning July 1, 2010); payment by the Commonwealth of KTRS' net premium cost (capped at 3.00% of payroll) of those members who retire July 1, 2010 and later that are not eligible for Medicare; and the increases in member and employer contributions scheduled to begin July 1, 2010. The valuation's discount rate assumption has been increased to 8.00% to reflect the impact of these changes, along with the adjustment to the Medical Insurance Fund's investment policy to achieve a long-term rate of return of 8.00%. Additionally, the assumed rates of health care inflation were revised to reflect current expectations. The actuarial accrued liability decreased from \$6.5 billion in 2009 to \$3.2 billion in 2010.

The Life Insurance Fund valuation indicates a total annual required contribution of 0.05% of active member payroll payable for the fiscal year ending June 30, 2013 is required to support the benefits of the Life Insurance Fund. The contribution rate of 0.05% equals the amount to be contributed in the prior fiscal year. With the State contributions to the Life Insurance Fund meeting the required levels, the discount rate for valuing liabilities is 7.50%.

The promised benefits of the medical and life insurance plans are included in the actuarially calculated contribution rates which are developed using the unit credit actuarial cost method with projected benefits. The market value of plan assets is used for actuarial valuation purposes. Gains and losses are reflected in the unfunded accrued liability that is being amortized by regular annual contributions as a level percentage of payroll within a 30-year period, on the assumption that payroll will increase by 4.0% annually. The assumptions recommended by

3550 Busbee Pkwy, Suite 250, Kennesaw, GA 30144

Board of Trustees
December 16, 2010
Page 2

the actuary and adopted by the Board are in aggregate reasonably related to the experience under the medical and life insurance plans and to reasonable expectations of anticipated experience under the medical and life insurance plans and meet the parameters for the disclosures under GASB 43 and 45.

CMC has prepared the trend information shown in the Schedule of Funding Progress in the Financial Section of the Annual Report and Schedule A and Schedule C shown in the Actuarial Section of the Annual Report.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the medical and life insurance plans and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the plans.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

In our opinion, if the State contributions to the Medical Insurance Fund are increased to the planned levels, the medical plans will begin to operate in a more actuarially sound basis. Assuming that required contributions to the Medical Insurance Fund are made by the employer from year to year in the future at the levels required on the basis of the successive actuarial valuations, the actuarial soundness of the Medical Insurance Fund to provide the benefits called for under the medical plans will improve.

Respectfully submitted,

Eric Gary, FSA, FCA, MAAA
Senior Actuary

Alisa Bennett, FSA, EA, FCA, MAAA
Principal and Senior Actuary

Accrued liability	<u>0.01%</u>	<u>0.01%</u>
Total	0.05%	0.05%

* Includes liability for death in active service. This amount could be segregated from the OPEB liability and assets could be split for active and post employment purposes. However, since this could be administratively burdensome and since death in active service liabilities can be considered de minimis, it is acceptable to consider the entire liability an OPEB liability under GASB 43 and 45.

- The valuation indicates combined member, employer, and State contributions of 7.20% of active member payroll would be sufficient to support the current benefits of the medical plans and State contributions of 0.05% of active member payroll would be sufficient to support the current benefits of the life insurance plan. Comments on the valuation results as of June 30, 2010 are given in Section IV and further discussion of the contribution levels is set out in Sections V and VI.
- Schedule C of this report outlines the full set of actuarial assumptions and methods employed in the current valuation. Since the previous valuation, the medical plan discount rate was increased from 4.50% to 8.00%. The impact of this change is shown on Schedule A.
- The valuation takes into account the effect of amendments to the medical plans enacted

through the most recent session of the Legislature. Effective July 1, 2010, retirees under age 65 began a three year phase-in of the Shared Responsibility Contribution, the basis of which will, in the third year, equal the Standard Medicare Part B premium required to be paid by retirees age 65 and over. This additional contribution required from retirees under age 65 resulted in a decrease of \$173,536,621 in the accrued liability and \$16,306,917, or 0.49% of payroll, in the annual required contribution. Effective July 1, 2010, the Commonwealth of Kentucky will begin paying the System's cost of medical insurance for new retirees under the age of 65, less what those retirees are otherwise required to pay (capped at an ultimate amount of 3.00% of payroll). This change represents \$590,529,804 of the accrued liability and \$68,599,691, or 2.06% of payroll, in the annual required contribution. Effective July 1, 2010, active members will begin a six-year phase-in to an additional contribution to the medical insurance fund. Previously, members hired before July 1, 2008 were required to contribute 0.75% of pay and members hired on or after July 1, 2008 were required to contribute 1.75% of pay. For the fiscal year ending June 30, 2013, member contributions will be 1.43% for University employees who became members of the System before July 1, 2008 and 1.75% for all other members.

Section II - MEMBERSHIP DATA

1. Data regarding the membership of the medical and life insurance plans for use as a basis of the valuation were furnished by the System office. The following table shows the number of active members and their annual salaries as of June 30, 2010 on the basis of which the valuation was prepared.

Group	Number	Annual Salaries (\$1,000's)
Full Time	58,983	\$ 3,211,563
Part Time	<u>17,404</u>	<u>110,051</u>
Total	<u>76,387</u>	<u>\$ 3,321,614</u>

Section III - ASSETS

1. As of June 30, 2010 the market value of Medical Insurance Fund assets for valuation purposes held by the medical plans amounted to \$241,223,840 and the market value of Life Insurance Fund assets for valuation purposes held by the life insurance plan amounted to \$87,904,593.
2. Schedule B shows the receipts and disbursements for the year preceding the valuation date and a reconciliation of the asset balances for the Medical Insurance Fund and the Life Insurance Fund.

Section IV - COMMENTS ON VALUATION

1. Schedule A of this report outlines the results of the actuarial valuation and illustrates the benefits of pre-funding the liability for the medical and life insurance plans. The valuation was prepared in accordance with the actuarial assumptions and the actuarial cost method, which are described in Schedule C.
2. The valuation shows that the medical plans have an actuarial accrued liability of \$1,258,246,049 for benefits expected to be paid on account of the present active membership, based on service to the valuation date. The liability on account of benefits payable to retirees and covered spouses

amounts to \$1,948,560,035. The total actuarial accrued liability of the medical plans amounts to \$3,206,806,084. Against these liabilities, the medical plans have present assets for valuation purposes of \$241,223,840. When this amount is deducted from the actuarial accrued liability of \$3,206,806,084 there remains \$2,965,582,244 as the unfunded actuarial accrued liability for the medical plans.

3. The normal contribution is equal to the actuarial present value of benefits accruing during the current year. The normal contribution for the medical plans is determined to be \$77,101,531 or 2.32% of payroll.
4. The valuation shows that the life insurance plan has an actuarial accrued liability of \$17,657,348 for benefits expected to be paid on account of the present active membership, based on service to the valuation date. The liability on account of benefits payable to retirees amounts to \$74,433,365. The total actuarial accrued liability of the life insurance plan amounts to \$92,090,713. This amount includes liability for death in active service. The liability for death in active service could be segregated from the OPEB liability and assets could be split for active and post employment purposes. As this could be administratively burdensome and, as death in active service liabilities can be considered de minimis, it is acceptable to consider the entire liability an OPEB liability under GASB 43 and 45. Against these liabilities, the life insurance plan has present assets for valuation purposes of \$87,904,593. When this amount is deducted from the actuarial accrued liability of \$92,090,713 there remains \$4,186,120 as the unfunded actuarial accrued liability for the life insurance plan.
5. The normal contribution is equal to the actuarial present value of benefits accruing during the current year. The normal contribution for the life insurance plan is determined to be \$1,275,631, or 0.04% of payroll.

Section V - CONTRIBUTIONS PAYABLE UNDER THE SYSTEM

1. Sections 161.420 and 161.550 of the Kentucky Revised Statutes provide the amounts employers and the State are required to contribute to the Medical Insurance Fund. These contribution amounts vary by fiscal year, date of membership, and employee type.

Employer Percentage of Payroll Contributions Made to Medical Insurance Fund						
Fiscal Year Ending	UNIVERSITY EMPLOYEES		SCHOOL DISTRICT EMPLOYEES (Non-Federal)*		OTHER EMPLOYEES	
	Members hired before 7/1/2008	Members hired on or after 7/1/2008	Members hired before 7/1/2008	Members hired on or after 7/1/2008	Members hired before 7/1/2008	Members hired on or after 7/1/2008
2011	0.920%	0.750%	0.250%	0.250%	1.000%	0.750%
2012	1.090	0.750	0.500	0.500	1.250	0.750
2013	1.430	0.750	1.000	1.000	1.750	0.750
2014	1.750	0.750	1.500	1.500	2.250	1.250
2015	2.270	1.270	2.250	2.250	3.000	2.000
2016 and Later	2.775	1.775	3.000	3.000	3.750	2.750

* In addition to the amounts contributed by School Districts on behalf of Non-Federal employees, the State contributes 0.75%.

KENTUCKY TEACHERS' RETIREMENT SYSTEM

For the fiscal year ending June 30, 2013, member contributions will be 1.43% for University employees who became members of the System before July 1, 2008 and 1.75% for all other members. CMC recommends employer and State contributions increase to the required amount of 5.77% of payroll for University employees hired prior to July 1, 2008 and 5.45% of payroll for all other members. The State is scheduled to contribute 0.05% of salary to the Life Insurance Fund for the fiscal year ending June 30, 2012. CMC's valuation indicates the same contribution of 0.05% for the fiscal year ending June 30, 2013 is required to sufficiently support the benefits of the life insurance plan.

REQUIRED CONTRIBUTION RATES For Fiscal Year Ending June 30, 2013 Medical Insurance Fund						
Normal		2.32%				
Accrued liability		<u>4.88</u>				
Total		7.20%				
	UNIVERSITY EMPLOYEES		SCHOOL DISTRICT EMPLOYEES (Non-Federal)*		OTHER EMPLOYEES	
	Members hired prior 7/1/2008	Members hired on or after 7/1/2008	Members hired prior 7/1/2008	Members hired on or after 7/1/2008	Members hired prior 7/1/2008	Members hired on or after 7/1/2008
Member	1.43%	1.75%	1.75%	1.75%	1.75%	1.75%
Employer (ARC)	1.43	0.75	1.00	1.00	1.75	1.75
State (ARC)	<u>4.34</u>	<u>4.70</u>	<u>4.45</u>	<u>4.45</u>	<u>3.70</u>	<u>3.70</u>
	7.20%	7.20%	7.20%	7.20%	7.20%	7.20%

Life Insurance Fund	
Normal	0.04%
Accrued liability	<u>0.01</u>
Total	0.05%
Member	0.00%
State (ARC)	<u>0.05</u>
Total	0.05%

- The valuation indicates that a total normal contribution of 2.32% of payroll is required to meet the cost of benefits currently accruing under the medical plans and 0.04% of payroll is required to meet the cost of benefits currently accruing under the life insurance plan. The difference between the total contribution and the normal contribution remains to be applied toward the liquidation of the unfunded actuarial accrued liability. This accrued liability payment is 4.88% of payroll for the medical plans and 0.01% of payroll for the life insurance plan.
- The unfunded actuarial accrued liability amounts to \$2,965,582,244 for the medical plans and \$4,186,120 for the life insurance plan as of the valuation date. An accrued liability contribution of 4.88% of payroll for the medical plans and 0.01% of payroll for the life insurance plan is sufficient to amortize the unfunded actuarial accrued liabilities over a 30-year period, based on the assumption that the payroll will increase by 4.0% annually.

Section VI - COMMENTS ON LEVEL OF FUNDING

1. The System's monthly contribution for retirees to opt into the medical plan is based upon date of hire and years of service at retirement. Additionally, beneficiary contributions may vary by plan election, Medicare eligibility, and tobacco use. Beneficiary contributions for dependents are targeted to be 100% of the cost of expected claims for spouses age 65 and older. Historically, this target has been achieved. 100% of the full cost for non-Medicare eligible dependents is paid through a combination of payments from beneficiaries and the State. Current employer and State contributions have been determined to be insufficient to fund the cost of the benefits to be provided. Benefits for university, school district (non-Federal), and other members are identical, although active employee contributions collected from university, school district (non-Federal), and other members differ. A listing of member contributions by fiscal year, date of membership, and employer type is provided in Schedule D.
2. The valuation indicates an increase in contributions is required to fund the medical plans in an actuarially sound manner and to ensure the future solvency of the Medical Insurance Fund. For University employees who became members of the System before July 1, 2008, a member contribution of 1.43% of payroll together with employer and State contributions of 5.77% of payroll are required to meet the cost of benefits currently accruing and provide for the amortization of the unfunded actuarial accrued liability over a period of 30 years. For the remaining membership, a member contribution of 1.75% of payroll together with employer and State contributions of 5.45% of payroll is required to meet the cost of benefits currently accruing and provide for the amortization of the unfunded actuarial accrued liability over a period of 30 years.

Section VII - ACCOUNTING INFORMATION

1. Governmental Accounting Standards Board Statements 43 and 45 set forth certain items of required supplementary information to be disclosed in the financial statements of the medical and life insurance plans and the employer.

Number of Active and Retired Members in Medical Plan as of June 30, 2010		Number of Active and Retired Members in Life Insurance Plan as of June 30, 2010	
GROUP	NUMBER	GROUP	NUMBER
Retirees currently receiving health benefits	34,315	Retirees	39,951
Spouses of retirees currently receiving health benefits*	6,834	Active plan members	<u>76,387</u>
Active plan members	<u>76,387</u>	Total	<u>116,338</u>
Total	<u>117,536</u>		

* Spouses of post-65 retirees, as well as surviving spouses of deceased retirees, pay 100% of the full contribution. 100% of the full contribution for non-Medicare eligible dependents is paid through a combination of payments from beneficiaries and the State.

SCHEDULE C
Outline of Actuarial Assumptions and Methods

The rates of retirement, disability, mortality, and termination used in the valuation were selected by the Actuary based on the actuarial experience investigation as of June 30, 2005 and adopted by the Board of Trustees on September 18, 2006. The discount rate, rates of future participation, health care cost trend rates, and expected plan costs were determined by the actuary based on plan experience.

Valuation Date: June 30, 2010

Discount Rate: 8.0% per annum, compounded annually for medical plans.
7.5% per annum, compounded annually for life insurance plan.

Health Care Cost Trend Rates: Following is a chart detailing trend assumptions.

FISCAL YEAR	MEDICARE PART B TREND	UNDER AGE 65 TREND	AGE 65 & OVER TREND
2011	4.4%	10.5%	9.0%
2012	-1.4	9.5	8.5
2013	3.0	8.5	7.5
2014	5.0	7.5	7.0
2015	4.1	6.5	6.5
2016	4.5	6.0	6.0
2017	5.5	5.5	5.5
2018	6.8	5.0	5.0
2019	6.1	5.0	5.0
2020	5.5	5.0	5.0
2021 and beyond	5.0	5.0	5.0

Age Related Morbidity: For retirees age 65 and older, per capita costs are adjusted to reflect expected medical cost changes related to age. The increase to the net incurred claims was assumed to be:

<u>Participant Age</u>	<u>Annual Increase</u>
65 - 69	3.0 %
70 - 74	2.5
75 - 79	2.0
80 - 84	1.0
85 - 89	0.5
90 and over	0.0

Anticipated Plan Participation: Representative values of the assumed annual rates of medical plan participation are as follows:

<u>Years of Service</u>	<u>Hired 7/1/08 and later</u>	<u>Hired after 6/30/02 and before 7/1/08</u>	<u>Years of Service</u>	<u>Hired 6/30/02 and earlier</u>	
				<u>Age 65 on 12/31/04 and earlier</u>	<u>Age 65 on 1/1/05 and later</u>
5-9.99	Not Eligible	10%	5-9.99	70%	25%
10-14.99	Not Eligible	25	10-14.99	80	50

60	4.20	0.122	0.85	11.00	3.50	2.50	16.5	30.0
62	4.10	0.137	0.85	11.00	3.50	2.50	12.5	25.0
65	4.00	0.159	0.85	11.00	3.50	2.50	26.0	30.0
70	4.00	0.195	0.00	0.00	0.00	0.00	100.0	100.0

*Includes inflation at 4.0% per annum.
 **Plus 5% before age 55 and 15% after age 55 in year when first eligible for unreduced retirement with 27 years of service.

Deaths After Retirement: According to the 1994 Group Annuity Mortality table for the period after service retirement. Special rates are used for the period after disability retirement. Representative values of the assumed annual rates of death after service and disability retirement are as follows:

**Annual Rate of
Death After . . .**

Age	Service Retirement		Disability Retirement	
	MALE	FEMALE	MALE	FEMALE
45	0.1578 %	0.0973 %	6.500 %	6.500 %
50	0.2579	0.1428	10.000	10.000
55	0.4425	0.2294	10.000	10.000
60	0.7976	0.4439	9.000	9.000
65	1.4535	0.8636	10.000	10.000
70	2.3730	1.3730	6.500	4.500
75	3.7211	2.2686	7.000	6.000
80	6.2027	3.9396	10.000	6.500
85	9.7240	6.7738	12.500	7.500
90	15.2931	11.6265	15.000	17.500
95	23.3606	18.6213	23.368	31.702

Actuarial Method: Costs were determined using the Projected Unit Credit Actuarial Cost Method. The annual service cost is the present value of the portion of the projected benefit attributable to participation service during the upcoming year, and the Actuarial Accrued Liability (AAL) is equal to the present value of the portion of the projected benefit attributable to service before the valuation date. Service from hire date through the date of full retirement eligibility was used in allocating costs.

Assets: Market Value as provided by KTRS. Return on assets assumed to be 8.00% for the Medical Insurance Fund and 7.50% for the Life Insurance Fund.

Spouse Coverage in Medical Plans: Use actual census data and current plan elections for spouses of current retirees. For spouses of future retirees, assumed 20% of future retirees will cover spouses, with females 3 years younger than males.

Medical Plan Costs: Assumed per capita health care costs were based on past experience and trended based on the assumptions. Following is a chart detailing retiree per capita assumptions. These amounts include medical, drug, and administrative costs and represent the amount that KTRS pays as the full contribution amount. For retirees age 65 and older, the average costs shown are normalized to age 65 and then age adjusted in calculating liabilities.

Average Monthly KTRS Full Costs & Contributions			
<u>Year</u>	<u>Pre-65 Full Cost and Contributions</u>	<u>Post-65 Full Costs</u>	<u>Post-65 Contributions</u>
CY 2004	\$ 293	\$ 274	\$ 274

CY 2006	461	315	315
CY 2007	458	283	283
CY 2008	484	278	278
CY 2009	545	301 ¹	285
CY 2010	594	373 ¹	342
CY 2011	626	289 ²	289

¹ Under GASB 43 and 45, cost reductions for the amount of the Medicare Part D Retiree Drug Subsidy cannot be taken into account in the gross cost calculations.

² 1,800 current benefit recipients are not eligible for premium-free Medicare Part A benefits. For these individuals, the full cost of coverage is, on average, \$606 per month. It is assumed no new members will enter this population, as all active members are assumed to have begun contributing to Medicare as of 4/1/1986.

SCHEDULE D
Summary of Main Plan Provisions as
Interpreted for Valuation Purposes

RETIREE MEDICAL ELIGIBILITY: For those hired prior to July 1, 2008, retiree medical eligibility is attained when an employee retires, which is possible after the completion of 27 years of service or attainment of age 55 and 5 years of service. For those hired on or after July 1, 2008, employees may retire after the completion of 27 years of service, the attainment of age 55 and 10 years of service, or the attainment of age 60 and 5 years of service, but must complete a minimum of 15 years of service to be eligible for medical benefits. Disabled employees, who are totally and permanently incapable of being employed as a teacher and under age 60, but after completing the minimum years of service requirement, are eligible for subsidized retiree medical coverage that is based on the number of years of service credit accrued at disability retirement. At the expiration of the disability entitlement period, the subsidy is recalculated based upon the number of years of service credit that would have accrued had the member remained active. Spouses of those actives who die while eligible to retire are eligible for retiree medical coverage when the death occurred prior to July 1, 2002.

MEDICAL PLAN CONTRIBUTIONS: The full contribution is provided to retirees with 27 or more years of service. The full contribution is determined by KTRS; the full cost is projected based on historical claims data. For retirees with less than 27 years of service, the following percentages of these full contributions are provided:

Percentage of Full Medical Contribution Provided to Retirees				
Years of Service	Hired before 7/1/02 (age 65 on 12/31/04 or earlier)	Hired Before 7/1/02 (age 65 on 1/1/05 or later)	Hired after 6/30/02 and before 7/1/08	Hired 7/1/08 and later
27 or more	100%	100%	100%	100%
26 - 26.99	100	100	95	95
25 - 25.99	100	100	90	90
20 - 24.99	100	100	65	65
15 - 19.99	90	75	45	45
10 - 14.99	80	50	25	Not Eligible
5 - 9.99	70	25	10	Not Eligible

Effective January 1, 2009, contributions towards pre-65 retirees and spouses healthcare are based upon the Commonwealth Capital Choice Plan which has a total rate of \$625.68 per month for single coverage (rate effective January 1, 2011). A minimum contribution of \$36.54 is required to be paid by all pre-65 retirees and an additional \$24.00 per month contribution is required for pre-65 retiree smokers.

Effective July 1, 2010, retirees under the age of 65 began a three-year phase-in of the Shared Responsibility Contribution. This contribution reduces the applicable amount of the full contribution provided by the System to retirees, and is the full Shared Responsibility Contribution amount adjusted by the appropriate percentage from the above table. In the first six months, the full amount equaled \$37 per month and will increase slightly to \$39 per month due to the increase in the Medicare Part B premium cost from \$110.50 in 2010 to \$115.40 in 2011. Effective July 1, 2011, the full amount will equal \$77, which represents two-thirds of the Medicare Part B premium. Effective July 1, 2012, the full Shared Responsibility Contribution will equal the Standard Part B premium that is paid by retirees age 65 and over.

Spouses of post-65 retirees, as well as surviving spouses of deceased retirees, pay 100% of the full contribution. For spouses of active members who died while eligible to retire, prior to July 1, 2002, KTRS provides the same subsidy they would have provided to the retiree for the lifetime of the spouse, or until remarriage. For spouses of active members who die while eligible to retire July 1, 2002, or later, spouses pay 100% of the full contribution. 100% of the full cost for non-Medicare eligible dependents is paid through a combination of payments from beneficiaries and the State.

MEMBER CONTRIBUTIONS: Active members make payroll contributions to the Medical Insurance Fund based upon the following schedule:

Employer Percentage of Payroll Contributions Made to Medical Insurance Fund						
Fiscal Year Ending	UNIVERSITY EMPLOYEES		SCHOOL DISTRICT EMPLOYEES (Non-Federal)*		OTHER EMPLOYEES	
	Members hired prior 7/1/2008	Members hired on or after 7/1/2008	Members hired prior 7/1/2008	Members hired on or after 7/1/2008	Members hired prior 7/1/2008	Members hired on or after 7/1/2008

Life Insurance Benefit

(1) Effective July 1, 2000, the Teachers' Retirement System shall:

(a) Provide a life insurance benefit in a minimum amount of five thousand dollars (\$5,000) for its members who are retired for service or disability. This life insurance benefit shall be payable upon the death of a member retired for service or disability to the member's estate or to a party designated by the member on a form prescribed by the retirement system; and

(b) Provide a life insurance benefit in a minimum amount of two thousand dollars (\$2,000) for its active contributing members. This life insurance benefit shall be payable upon the death of an active contributing member to the member's estate or to a party designated by the member on a form prescribed by the retirement system.

Note: Qualified members working 45 days per year will be eligible for survivor benefits and a life insurance benefit for the balance of the fiscal year and disability benefits under certain conditions. For substitute and part-time members, the survivor benefits and life insurance benefit are provided during the first 44 days if death occurs as the result of a physical injury on the job. The disability benefit is available as a direct result of a physical injury on the job during the five-year vesting period. After vesting, the disability benefit is available upon working 45 days for the balance of that fiscal year in accordance with the regular KTRS disability program.

KENTUCKY TEACHERS' RETIREMENT SYSTEM
